

Earn Rewards

For the Way You Farm

Bayer Carbon Program
POWERED BY
FIELDVIEW

Our new program offers cash incentives for climate-smart farming practices you have implemented or will implement on your acres.

Starting this year, eligible acres can earn up to \$9 per acre, per year for verified and validated practices that have been shown to support improvements in soil health. With program flexibility built right in and Bayer's commitment to growers in a developing carbon marketplace, we're helping you leave healthier soil for future generations.

The Benefits of our Program

Flexible and simple

You choose which practices you enroll in, then it's our turn to do the rest. Bayer takes care of practice validation, soil sampling and beyond.

Partner in results

We're committed to our growers and want you to benefit from expanding carbon markets. If carbon prices increase, your rewards may increase too.

Certainty for you

You're rewarded for the verified and validated practices you adopt, period. There's no need to worry about how many tons of carbon you generate.

How much can I earn?

You can choose which climate-smart practices to adopt, earning \$3, \$6 or \$9 per acre, per year following verification of practices by Bayer.

\$3 per acre, per year	\$6 per acre, per year	\$9 per acre, per year
no-till/strip-till	cover crops	no-till/strip-till + cover crops

Which fields are eligible?

Start date of continuous practices ^{1,2}	Qualifies for 2021 Carbon Program?	Qualifies for historical payment ⁴ ?	Qualifies for future payment ⁴ ?
Started prior to January 1, 2012	No	No	No
Started on or after January 1, 2012	Yes	Potentially qualifies for up to 5 years of historical payment ³	Yes
Started after January 1, 2021	Yes	No	Yes

¹ Continuous practices are agronomic practices that are maintained on a field regardless of crop rotation. The practices considered for this year's program are no-till/strip-till and cover crop.

² For combinations of practices implemented on the same field but different years, refer to rules above to determine eligibility for payment on a by-practice basis.

³ Assessed on a case-by-case basis upon verification of historical practices (will require additional data).

⁴ Assuming other eligibility criteria are met (e.g., in an eligible state) and subject to verification that practices have been performed.

Eligibility Examples

Fields that have been no-till since before 2012 and adopted cover crops in 2015 are eligible for cover crop rewards.

Fields that have not yet adopted no-till/strip-till or cover crop practices are eligible for both cover crop and no-till/strip-till rewards.

Fields that have been no-till since 2016 and adopted cover crops in 2014 are eligible for both no-till and cover crop rewards.

Fields that have used both no-till/strip-till and cover crops since 2011 are not eligible at this time.
